DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Radziewicz et al. [US Patent 5 854 897 A].

Regarding claim 1, Radziewicz discloses a message router system for a server system that communicates with embedded devices over a data network, the router system comprising:

a router that transfers messages to the embedded devices on the data network when the embedded devices are accepting messages and a message store that temporarily stores messages addressed to embedded devices until the embedded devices can accept messages [column 6, lines 33-64].

Claim 8 is rejected under 35 USC 102(b) since claim 8 contains the same limitations as recited in claim 1.

Regarding claim 2, Radziewicz discloses a message router system as recited in Claim 1, further comprising a system manager that tracks states of embedded devices on the data network and whether the embedded devices are able to receive messages [column 11, lines 30-67].

Art Unit: 2143

Claim 9 is rejected under 35 USC 102(b) since claim 9 contains the same limitations as recited in claim 2.

Regarding claim 3, Radziewicz discloses a message router system as recited in Claim 2, further comprising a queue manager for facilitating the transfer of messages between the message router and a process [column 8, lines 15-44].

Claim 10 is rejected under 35 USC 102(b) since claim 10 contains the same limitations as recited in claim 3.

Regarding claim 4, Radziewicz discloses a message router system as recited in Claim 1, wherein the router retrieves messages from the message store when a system manager indicates that an embedded device to which the messages are addressed is able to accept the messages [column 11, lines 30-67].

Claim 11 is rejected under 35 USC 102(b) since claim 11 contains the same limitations as recited in claim 4.

Regarding claim 5, Radziewicz discloses a message router system as recited in Claim 1, further comprising a bulk data transfer manager for transferring larger data files between the server system and the embedded devices [column 12, lines 23-column 13, line 5].

Claim 12 is rejected under 35 USC 102(b) since claim 12 contains the same limitations as recited in claim 5.

Regarding claim 6, Radziewicz discloses a message router system as recited in Claim 5, wherein larger data files are transferred to the embedded devices by the router sending the embedded devices a message to download a file and a location of the file, the embedded devices

Art Unit: 2143

contacting the bulk data transfer manager to obtain the file [column 12, lines 23-column 13, line 5, specifically column 12, lines 26-39].

Claim 13 is rejected under 35 USC 102(b) since claim 13 contains the same limitations as recited in claim 6.

Regarding claim 7, Radziewicz discloses a message router system as recited in Claim 6, wherein the embedded devices directly contact the bulk data transfer manager to obtain the file without sending a message via the router [column 12, lines 23-column 13, line 5, specifically column 12, lines 31-39].

Claim 14 is rejected under 35 USC 102(b) since claim 14 contains the same limitations as recited in claim 7.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
